

Former Mount Hope Street Manufactured Gas Plant Cleanup Project Construction Complete

Liberty™

North Attleboro, Massachusetts

January 2022

To the North Attleboro community,

Thank you

Liberty Utilities' (Liberty) environmental cleanup of the former Mount Hope Street manufactured gas plant site is complete! The project began in August 2020 and Liberty and its contractors removed

impacted soil throughout the site, including sediment within the Ten Mile River and Mire Brook, and restored the river, wetland, and upland areas disturbed during construction. North Attleborough was well represented during this effort by the town council, town manager, Conservation Commission, Department of Public Works, Historical Commission, police and fire departments, and the electric department. Liberty greatly appreciates the community's patience and understanding throughout this project, and in particular, the members of the community who live and work in close proximity to the site. Again, thank you.

Vegetation is established in the upland and wetland areas and will continue to grow in the spring. The work removed invasive species and the new plantings are designed to restore and improve the ecosystem. Liberty's contractors will continue to monitor and maintain the plantings, as needed, in the upcoming growing seasons to ensure the long-term success of the environmental restoration. The pictures included with this final update demonstrate the significant improvements made over the past 16 months.

Again, Liberty offers its sincere thanks to the North Attleboro community.
