NATURAL GAS  
SAFETY  
INFORMATION

# SMELL GAS?

Leave the premises  
and call us immediately!

**Emergency Number: 800-936-7000  
and 911**

**Liberty Utilities**

Cut out and keep handy

What you smell is a harmless chemical called mercaptan. We have added it to help you and your entire family identify natural gas.

## **IF YOU SMELL GAS – DON'T WAIT!**

**No matter how slight - leave the premises and call us immediately.**

### **How to recognize a leak:**

#### **Smell**

Recognizing the odor used in the scratch & sniff - similar to rotten eggs.

#### **Sight**

Seeing a white cloud, mist, fog, bubbles in standing water or blowing dust.

#### **Sound**

Hearing an unusual noise like roaring, hissing or whistling.

### **What to do if you suspect a leak:**

**Move** to a safe environment and call us immediately. Do not use your telephone or cell phone in your home.

**Provide** the exact location with cross streets.

**Do not** smoke, light candles or operate electrical switches or appliances. Doing so can produce a spark, ignite the gas and cause an explosion.

**Let us know** if sewer construction or digging activities are going on in the area.

**DO NOT ASSUME SOMEONE ELSE WILL REPORT THE CONDITION.**

Natural gas has an excellent safety record, but like all forms of energy, it must be handled properly. If improperly handled, it may cause a hazardous condition such as a fire, explosion or asphyxiation.

### **We work diligently to ensure pipeline safety through a variety of measures including:**

- Design and construction practices.
- Inspection, monitoring, testing, and notification systems and programs.
- Workforce training and qualification.
- Public education programs.

### **Call before you dig.**

Damage to a pipeline due to excavation activities may cause a gas leak and has the potential to ignite.

Before beginning any excavation activity, have all underground utilities marked-out by calling the number shown to the right.

**It's the law, and it's for your safety.**
