Warning: corrugated stainless steel tubing

Corrugated stainless steel tubing (CSST) is a thin-walled metallic gas piping product that can be used as an alternative to conventional gas piping material. This flexible piping is commonly coated in yellow plastic. **If your home uses CSST, we recommend that it is inspected on an annual or semi-annual basis by a qualified plumber** for proper installation and bonding. Homeowners should also perform a visual inspection at least every three months to check for damage. CSST that is not properly bonded could cause an accidental leak or fire when struck by lightning.
